

Thank you for reading my regression paper.
This is my regression equation:

$$Y = X\beta + \epsilon \tag{1}$$

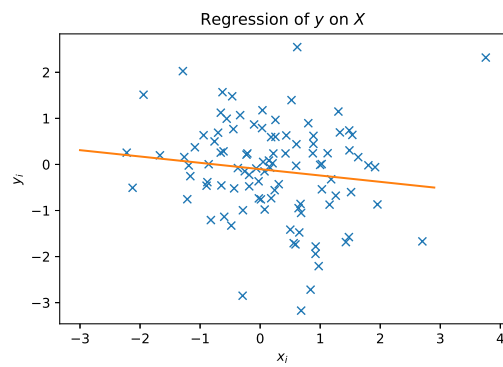

Now we will estimate the model.

...

These are the regression coefficients:

$$\hat{\beta}_0 = -0.1026 \tag{2}$$

$$\hat{\beta}_1 = -0.1376 \tag{3}$$

This is a scattergraph of the regression results:
This concludes my paper.
